

A hand-drawn technical sketch of a gate cross-section. The diagram shows a rectangular gate body with several internal and external dimensions labeled in Czech. At the top left, a red arrow points to the edge labeled "DĚRUŠKA PŘEVÝŠNĚ". Moving right along the top edge, there is a section labeled "NABĚH" followed by a dimension of "20L". This leads to a central grey-shaded area labeled "DLAŽBA VJEZDU" with a width of "10-20L". To the right of this is another "NABĚH" section, followed by a dimension of "100-150L". The far right edge is also labeled "DĚRUŠKA PŘEVÝŠNĚ". A horizontal dimension at the bottom indicates the total "ŠÍŘKA BRÁNY" (gate width). On the left side, a vertical dimension is labeled "ŠÍŘKA CHODNIČKY" (path width) with a value of "20L". Inside the gate body, a blue-shaded area is labeled "VYUHLINĚNÝ PAS" (polished strip) with a height of "10-20L". Another vertical dimension on the right side is labeled "100-150L".
